Clipboard365 Ltd

T: +44 (0)208 935 5490

E: info@clipboard365.co.uk

W: www.clipboard365.co.uk

“With Clipboard365, it is much easier to assess and manage the needs of every member of staff and gain immediate insight into compliance across every section of the company - all at a very competitive price.”

Andy Cole, Europa Group Ltd

Why Clipboard365

Are you still providing face-to-face DSE training or risk assessments? Do Word documents, PDFs, print-outs or spreadsheets form the basis of carrying out and managing your DSE risk assessments? Is the DSE process time-consuming, expensive or inefficient? Is staff working time split between the office and home? Do you have a small Health and Safety team or limited resource that you'd like to maximise?

If you answered 'Yes' to any of these questions, we can help.

When do you need us?

When your organisation has staff who regularly use DSE in their work, it's a regulatory requirement that they are trained in the proper use of their DSE equipment, and risk assessments are completed of their work environment and managed within a timely manner.

Why do you want us?

Clipboard365 takes the hard work out of administering DSE training and risk assessment, and demonstrate compliance while saving time and money – all from the convenience of a desktop or laptop computer, tablet or smartphone.

Our Service In Numbers

Courses and risk assessments completed so far

Fantastic years of helping DSE teams protect their staff and achieve compliance

Customisable courses and risk assessments for every DSE working environment

E-mail enrolments, reminders, notifications and automatic risk closures so far

In as little as a few days you could ...

1

Automate your entire DSE training and risk assessment process from staff enrolment to training, risk assessment and risk resolution

2

Complete hundreds of training and risk assessment sessions in days, not months

3

Get real-time reports on compliance levels across every area of the organisation

4

Reduce costs and paper clutter by electronically reviewing and managing risks while fulfilling legal obligations at the same time

Top 6 reasons

To get started with online DSE right away!

Save money

Compared to other forms of DSE training and risk assessment, online DSE software is easily the least expensive option. The cost of delivery per person is significantly lower than other approaches such as costly face-to-face DSE training and assessments. This means a significant reduction in DSE-related costs and demands on already limited budgets.

Save time

One of the main challenges in getting training done in any corporate environment is fitting this into staff's varied and busy work schedules. With our online DSE training and risk assessment system, there's no scheduling nightmare as the system is always available and can be effectively used without staff ever leaving their workstation.

Automation

There's a lot of repetition involved in administering many aspects of DSE training and risk assessment. This may lead to unnecessary duplication of effort within your Health & Safety team. With our online DSE training and risk assessment system, a lot of these tasks are automated, freeing up your team to more effectively use their time and resource.

Real-time reports

In order to understand levels of DSE compliance within your organisation and demonstrate fulfilment of your legal obligation, you need access to quality data analysis within a timely manner. Our platform provides real-time reporting across all locations, divisions and departments when you or other team members need it.

Customisable

The necessary training, risk assessment and management tools are provided to achieve compliance right out-of-the-box. So you get started right away with minimum fuss. You may also customise the courses to reflect your organisation's brand, equipment and policies.

Environment-safe

All training, risk assessments, risk resolution and reporting are done within the online portal, thereby eliminating the environmental cost of excessive paper usage and unnecessary vehicular travel between offices and locations.

Our packages

DSE training and risk assessments for all staff

Office workers

Course overview

- DSE, their effect and the regulations that apply
- Adjusting your DSE, workstation and environment in the office

Jagex Game Studio

Kuoni GTS

Why they choose us

Maddie Burgess, Jagex Game Studio

Jagex is a globally recognised games developer with hundreds of staff. We were undergoing a significant office upgrade that required everyone to be re-trained and undertake DSE risk assessments. We chose Clipboard365 as the software was affordably priced, customisable and easy to use. From initial roll-out, we were able to effortlessly engage members of staff with concise, interactive training and risk assessment modules. This saves us a lot of time and provides a means of quickly responding to staff issues.

Andy Cole, Europa Group Ltd

We have hundreds of computer users across multiple sites. With Clipboard365, it is much easier to assess and manage the needs of every member of staff. Some tasks that usually take hours and even days to complete, now takes minutes. The software has tools that automate a lot of things as well as reports that give us immediate insight into compliance and the distribution of risks across every section of the company - all at a very competitive price. We are very pleased with Clipboard365, so much that I'd recommend the web-based software to manage DSE within any organisation.

Emma May, Semmler

Semmler is a leading innovator in the field of software engineering analytics. Our team comprises a mix of highly skilled software engineers and other computer users, and we needed a system that provided the right balance of training and risk assessment for all staff. Clipboard365 did just that. I am really impressed with how easy it has been to roll-out the software, get in contact with the Clipboard365 team to change something, and how quick and efficient they've been to get it all done. Fantastic product and superb customer service.

A bit about us

Building better software for Health & Safety teams

Experience that matters

We have collectively been developing online DSE training and risk assessment software solutions for small, medium and large organisations for over fifteen years. This experience and knowledge has culminated in a solid, feature-rich and affordable online platform with engaging, interactive courses and risk assessments.

Software that works for you

Software should be useful, easy-to-use and affordable, so you can work smarter and get more done in less time. It is for this reason that powerful automation tools are built into the core of the Clipboard365 platform. The software may be configured as desired and even customised further to ensure an organisation-specific user experience from logon to training and risk assessment completion.

Customer first ethos

Our products and services are backed by our commitment to support our customers whenever they need it. Have a question about a feature? Give us a call. Ready to roll out but need some help preparing a staff list? Drop us an email. Stumble upon a problem? Raise a support ticket. We are always happy to hear from you.

Safe and secure

No software to install - only a web browser and internet access required to use our platform. With 99.9% uptime, 24/7 monitoring, daily data backup, 256-bit security and Cyber Essentials certified by the UK Government backed scheme, access to your data is guaranteed and protected.

What's next?
